Hiring Manager

Cover Letter — Sr. Site Reliability / Cloud & Security Engineer

Dear Hiring Manager,

I am writing to express my interest in your team. With over 10 years designing and operating cloud-native infrastructure at scale, most recently as Sr. Site Reliability Engineer and technical leader at Cuemby, a US-based intelligent cloud infrastructure company, I am excited to bring that depth to an organization building reliable, secure systems.

In that role, I owned the reliability engineering and platform strategy for a hybrid cloud serving businesses across the Americas. My work spanned advanced Kubernetes workloads (Cilium, Rook Ceph, Velero), multi-cloud environments on AWS, GCP, and Azure, infrastructure automation with Terraform and Ansible, and end-to-end observability using Prometheus, Grafana, and OpenTelemetry. I drove DevSecOps practices across the platform — vulnerability scanning, IAM hardening, secrets management — and integrated AI tooling into runbooks and postmortems to continuously raise the reliability bar.

My background also includes deep networking and security foundations — BGP, IPv6, DNS/DNSSEC, firewalls, and mesh VPNs (WireGuard, OpenVPN, IPsec) — which I apply daily across hybrid and multi-region environments. I have spoken at KCD Colombia 2025 and FLISOL Medellín on cloud-native and infrastructure topics, led a network and security research group at ITM for four years, and serve as the bilingual (EN/ES) technical bridge between engineering and US-based stakeholders.

I would welcome the opportunity to discuss how I can contribute to your team. My full CV is available at cv.c-gaviria.com, and I am happy to provide additional context or references on request.

Thank you for your consideration.

Sincerely,

Christian Camilo Gaviria Castro
